

BUILDING COMPUTER SOLUTIONS

The future is digital. Secure it with us.

T.I. RESCUE
SEGURIDAD INFORMÁTICA

FOUR ISO CERTIFICATIONS DEFINE OUR SUPERIORITY

Our commitment to cybersecurity goes beyond mere rhetoric. It's tangible and validated by four prestigious ISO certifications: **9001, 27001, 20000-1, and 22301**. These aren't just acronyms, but a testament to our dedication to delivering top-tier services. They represent our promise of **quality, security, efficiency, and resilience**. By choosing us, you're not just opting for a cybersecurity provider, but a certified ally who understands and meets the highest international standards.

TOTAL COMMITMENT: BEYOND BASIC SECURITY.

With our certifications, we ensure **quality, information security, IT excellence, and business continuity**. They represent our commitment, professionalism, and integrity. Choosing us means opting for elite cybersecurity with solid backing.

Our services

we transform technological challenges into **competitive advantages.**

Comprehensive solutions

Infrastructure

Our robust digital infrastructure ensures smooth operation, providing full control and efficiency in every segment of your business network.

Communication

Our focus on communication boosts efficiency, facilitating agile decisions, swift responses, and seamless interdepartmental collaboration..

Hardware

op-quality hardware, designed to ensure uninterrupted operations and tailored to the specific needs of your company.

Security

We offer a solid shield against cyber threats, rigorously protecting your valuable information, ensuring the trust of your customers and associates.

Consultancy

Our consultancy service provides specialized advice, offering innovative solutions designed to tackle your unique technological challenges.

INFRASTRUCTURE SERVICES

FUNDAMENTAL CONCEPT OF IT INFRASTRUCTURE

A company's **IT infrastructure** consists of multiple **technological devices** responsible for the **administration and control** of the network. These devices ensure the **security of information** by upholding standards of **integrity, confidentiality, and availability**.

Data Server

Servers: ensuring integrity and confidentiality.

Cloud Server

Data management and security on cloud servers.

Bunker Backup

Operational continuity in the face of damages and cyber threats.

Virtualization

Multiple servers from a single physical entity.

Monitoring

24/7 Monitoring: Constant surveillance, immediate alerts, and quick response for servers.

Disaster Recovery Plan

Safeguarding technology and infrastructure to ensure business continuity in the face of adversities.

Data Server

In a world where **information is vital**, our data server not only stores but also **safeguards every bit and byte** with advanced systems. We **ensure integrity and confidentiality**, and allow for the installation and operation of applications directly on the server. Combining technical robustness with flexibility, we offer more than just a service: we provide peace of mind that your data is safe and accessible, **propelling your business in the digital age**.

Bunker Backup

Specifically **designed to isolate and safeguard backup information**, it ensures swift and effective recovery, whether from technical damage or human errors. But we don't stop there; with **advanced encryption**, even in the unlikely event of a cyberattack, your backups remain unreachable to intruders. With **Bunker Backup**, you're not just protecting your data; you're also ensuring the **continuity and resilience** of your business against challenges. It's more than just a backup system; it's your **ally in cybersecurity and operations**.

Monitoring

With 24/7 alerts, you're always informed about the status and performance of your digital assets. But it's not just about monitoring; it's about reaction. Upon detecting any anomalies, we give you the chance to intervene swiftly, ensuring your operations continue to run seamlessly. Imagine the peace of mind knowing that, come what may, you have a system that looks out for you and keeps you one step ahead. With our **monitoring service**, you turn uncertainty into certainty and challenges into opportunities.

Cloud Server

In the digital age, where **accessibility and security** are paramount, our Cloud server emerges as the ultimate solution. It not only stores vast amounts of data but also ensures their **integrity, confidentiality, and constant availability**. Imagine having instant access to view or edit your information at any moment, from anywhere.

Virtualization

Our **virtualization service** goes beyond mere data preservation. It's an **innovative solution** designed to optimize and transform your technological infrastructure. Imagine being able to scale, adapt, and evolve your operations without traditional boundaries. But that's not all; with **cutting-edge security measures**, your systems and data are fortified, even against the most sophisticated cyber threats. Virtualization not only offers you more agile and cost-effective management, but it's also your **shield against disruptions and vulnerabilities**.

Disaster Recovery Plan

Our disaster recovery plan is your shield against natural adversities. It's not just about having backups; it's about resilience and adaptability. With a holistic approach that combines policies, tools, and procedures, we ensure that, even after a catastrophic event, **your vital infrastructure and technological systems are restored and continue to operate**.

SECURITY SERVICES

THE IMPORTANCE OF **CYBERSECURITY**

Today, **computer security** is one of the most important aspects to consider for small, medium, or large businesses. This is because it prevents **cyber attackers** from accessing, encrypting, or stealing your information or that of your customers, leading to **significant costs or halting operations**.

Web Security

Advanced Techniques for Web application Protection.

Firewall

Premium Digital Shielding: Discover Our Firewall.

Antivirus Software

Platinum Level: antivirus for the most demanding.

Remote Connection

Access and Remote Support with Integrated Security.

IDS / IPS / FIM / HIDS

Digital Barrier: Defense Against Unauthorized Attacks.

Web Security

Web application security is a critical discipline within **cybersecurity**, focused on **protecting applications** from threats such as **SQL injection** and **cross-site scripting**. This specialization not only aims at safeguarding the application itself but also the data it manages. Given the pivotal role that web applications play in **modern business operations**, ensuring their integrity and the safety of the data they store is essential to maintain customer trust and business continuity in today's **digital world**.

Software Antivirus

In the dynamic digital world, where every action can open doors to threats, our antivirus software stands as the **guardian** of your **digital assets**. Using advanced technology, it **neutralizes malware** in real-time, **protecting your information** from viruses and spyware. Aware of the impact of a security breach, our software not only defends but also **informs about possible vulnerabilities**. By choosing our antivirus, you acquire more than just a tool: you gain a **secure digital environment**, free from **cyber threats**.

IDS / IPS / FIM / HIDS

In the era of cybersecurity, keeping your network protected is more crucial than ever. Our combined system of **Intrusion Detection (IDS)**, **Intrusion Prevention (IPS)**, **File Integrity Monitoring (FIM)**, and **Host Intrusion Detection System (HIDS)** acts as an advanced digital sentinel. It not only detects intrusion attempts in real-time but also takes proactive measures to prevent them. Imagine a guardian that not only alerts about threats but also neutralizes them.

Firewall

A firewall, also known as a "cortafuegos" in Spanish, is a **vital component in computer systems** and networks. It acts as a **barrier**, filtering data traffic to block unauthorized access while allowing the **safe flow** of legitimate communications. It's essential for maintaining the integrity and security of information, **protecting against attacks and intrusions** in a digital world full of threats.

Remote Connection

In a world that values **connectivity**, our remote connection software allows you to **access and control** computers and devices from anywhere. Whether working from home or on the go, you're never disconnected from your essential resources. With **robust security** and a user-friendly interface, we turn "being present" into a **seamless digital experience**. Choose **efficiency** and the power to connect, always with you.

COMMUNICATION SERVICES

KEY TO BUSINESS PRODUCTIVITY

Communication tools within different companies allow for the ***coordination of processes***, thereby **increasing fluidity and productivity**, reducing response times and information loss, and helping to maintain a **pleasant environment for users**.

Mail Server

Optimized Security in Sending and Receiving Emails. and confidentiality.

IP Telephony

Raising the Standards of Voice Communications.

Internal Chat

Business Conversations with Superior Encryption.

Intranet

Keeping Internal Information, Truly Internal.

Mail Server

In the digital age, **efficient communication** is essential for any business. Our mail server not only sends and receives messages but also **filters and protects** them, eliminating noise and **shielding you from threats**. Every email is treated with priority, ensuring you never miss vital information. With a **robust infrastructure** and an intuitive interface, we provide **confidence** in your communications.

IP Telephony

Imagine having **clear and uninterrupted communications**, with the **flexibility** to connect from anywhere. It's more than just a call; it's a **revolution in communication**, offering **efficiency** and **adaptability** for modern needs.

Intranet

Our Intranet is a **secure and efficient portal** that allows teams to access and share **vital information in real-time**. Powered by Internet protocol technology, it enhances **collaboration and productivity** within your organization.

CONSULTING SERVICES

REGULATIONS, TESTS AND ADVANCED TECHNOLOGY

Our **primary objective** in various consultations is to provide the client with **viable recommendations** or suitable measures for the solutions to each of their needs, allowing them to keep their data storage assets safe while preserving the **confidentiality of the information**.

ISO Consulting

From Vision to Certification:
Specialized ISO Consultancy.

Ethical Hacking

Know Your Weaknesses: Ethical
Hacking to the Rescue.

Technical Infrastructure Consulting

Comprehensive Advice for a
Successful Technical
Implementation.

ISO Consultancy

This is a service that **accompanies and guides companies in implementing** measures to improve results from the perspective of the standard in the IT area for ISO 9001 and 27001 standards.

Technical Infrastructure Consultancy

Our service focuses on **guiding companies towards the optimal implementation of the latest technologies available in the market.** We assess your organization's specific needs and design customized solutions that not only keep you up to date with technological innovations but also enhance operational efficiency and your company's competitiveness.

Ethical Hacking

The primary goal of **Ethical Hacking is to exploit existing vulnerabilities in systems** by conducting intrusion tests. These tests serve to **verify and evaluate the physical and logical security of information systems,** computer networks, web applications, databases, and servers.

HARDWARE

SERVICES

KEY TO PRODUCTIVITY

In order to run the **essential applications for the operation of various companies**, it is necessary to have the appropriate equipment to fulfill these functions, maintaining optimal performance.

It is important to **keep this in the right conditions** and with the necessary maintenance, **preventing operational halts** and thereby extending the lifespan of the company's assets.

Laptops

We offer high-quality laptops tailored to your company's demands.

Servers

Powerful and efficient servers for solid solutions.

Maintenance

Equipment maintenance for optimal performance and long-term savings.

OUR VALUABLE **CLIENTS**

Trust-Based and Excellence-Driven Partnerships

In TI Rescue, every client is a testament to our commitment to excellence in cybersecurity. Here, we highlight some of the leading organizations that have entrusted us to strengthen and safeguard their digital operations.

WE ARE A **STRATEGIC ALLY**

For the cybersecurity and technological infrastructure of companies.

COMPANY FOUNDED IN **2015** BASED IN **COLOMBIA**

Operating **worldwide**

MISSION

We specialize in IT support and security, committing to the highest international standards, including ISO 9001, 27001, 22301, and 20000-1. Our mission is to ensure operational continuity for businesses of all sizes through efficient and secure technological solutions. We are dedicated to offering personalized services tailored to the unique needs of each client, **preventing interruptions, and promoting their success.**

VISION

We envision being global leaders in IT management and security, providing personalized and efficient solutions that ensure operational continuity. We are committed to innovation and adherence to the strictest quality and security standards. Our goal is to stay at the forefront, always being the first choice for our clients. We are dedicated to offering personalized services tailored to the unique needs of each client, preventing interruptions, and promoting their success.

Your security, our priority

custom solutions **solutions**

Solutions tailored to the needs of each client, regardless of how small or large the company is.

Direct **communication**

No queues, waiting, or turns.

24/7 **support**

Constant updates **updates**

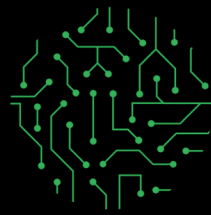

Immediate solutions. In this way, we prevent data loss and always manage to stay one step ahead.

Hardware **savings**

Implemented in the software.

Attentive **staff**

We're here to assist you every step of the way. If you have any questions or simply want to talk about your cybersecurity needs, here are our contact channels:
